Attached please find PDFs of the Toxicologist Reports and Draft Residential Data Reports for the 4 locations that were re-sampled in May (5/23/12 - 5/24/12).

While the data has been validated and is considered final, the reports are considered DRAFT until our review is completed.

## Ex. 5 - Deliberative

The "tox" reports include additional information (e.g. lab qualifiers, MDLs, QLs, RLs) to assist in the tox review which is

not included in the residential reports.

Please note that there is a new qualifier (J+). Basically, the J+ indicates that the result may be biased estimated high - based on a QC sample being outside of the acceptable range. An updated key with an official explanation of the J+ will be provided to residents with the data.

Please feel free to contact me with any questions and/or if you need additional info.

Thank you - Kelley
